

## Shelby Public School District COVID-19 Press Release

At 4:00 PM, on Monday, August 30, 2021, Shelby Public School District was notified by the Toole County Health Department that an elementary student at Shelby Elementary School tested positive for COVID-19. The Toole County Health Department will be completing the appropriate contact tracing, and **all individuals affected will be contacted by the Health Department and informed of their next steps.** Please do not call the Health Department as that will only slow the process of informing those that need to be contacted.

As a reminder, Shelby Public School District recommends that any person who feels sick, should stay home and contact their healthcare provider. School officials will continue to monitor the situation and will provide further relevant information if and when it becomes available.
